**SB-SCSI Raid Blade****CompactPCI SCSI Raid Blade**

The SANBlaze SB-SCSI CompactPCI SCSI blade provides CompactPCI system designers the flexibility to add in-chassis storage options utilizing enterprise class storage technologies such as SCSI drives and Raid.

The SB-SCSI Raid Blade provides single or dual SCSI drives in a single- or dual-slot CompactPCI form factor. Multiple blades can be daisy-chained providing expandability and redundancy options previously unavailable to CompactPCI system designs.

When using a SANBlaze SB-PMC320 PMC SCSI adapter connected to two SB-SCSI blades, the system could build a mirrored set across two separate hot swappable boards, providing storage redundancy at both the disk and board level, for example.

**FEATURES:**

- Single or dual SCSI drive options with SCSI Ultra320 support
- In/out high density SCSI connectors support daisy chaining with auto-termination
- 36 GB to 146 GB of storage in a 6U, single- or dual-slot CompactPCI form factor
- Can provide Raid 0 (striping) and Raid 1 (mirroring) functionality
- Hot swappable, IPMI support
- Removable hot swap drive version available
