iSPAN 3676

Designed especially for high-availability, high-bandwidth access applications, the iSPAN 3676 provides OC-3/STM-1 ATM network interface connectivity.

Today's networks require scalable, high-performance platforms with the flexibility to allow network capacity to keep pace with customer's demands. The iSPAN 3676 controller meets the needs of a variety of applications, including IP switching and routing, Internet connections and other applications that require the Quality of Service (QoS) guarantees provided by ATM.

INTERPHASE®

Designed To Perform. Designed To Last.™

FEATURES

- ✦ Single-width, mid-height AdvancedMC
- ✦ Single or Dual OC-3/STM-1 interfaces via SFP optics
- ✦ PCI Express (AMC.1) interface to the carrier
- ✦ Multimode/Single mode fiber
- ✦ Mindspeed™ RS8236 155 Mbps ATM SAR
- ✦ Support for ATM
- ✦ AAL5 and AAL0 Adaptation Layers 2
