Hybricon is a world class solutions company providing integrated system solutions, electronic enclosures, and backplanes for military, telecom and commercial applications. As an ISO 9001 registered company, Hybricon is dedicated to ensuring the highest level of quality – a necessity for products that must be able to function anywhere, anytime. Hybricon is the industry leader in backplane design, offering the newest technologies for VPX, VXS, VME64X, CompactPCI, mTCA, and custom bus structures.

**FEATURES**

- › Cooling for up to 130 W/slot. Supports 3U VPX, VME, and CompactPCI backplanes. Supports standard peripherals
- › 350 W Embedded Power Supply. Convenient top carrying handle
- › CompactPCI® and VME backplanes available. IEEE 1101.10 / 11 compliant card cage. Pac-2000® modular design
- › Up to 350 W embedded power advanced cooling design: Airflow: Lower front to upper rear 15 CFM average
- › High performance fan mounted in rear cooling for 130 W/slot, or 65 W/slot with high pressure PMC mezzanines
- › Peripheral mounting for front-access 5.25", CD or DVD drive and 3.5" hard disk drive
