PFM-540i

The PFM-540i is a single board computer based on the AMD Geode LX800, 500 MHz processor. This low-power PC/104 module is a versatile product featuring Dual Ethernet, 4 USB 2.0 ports, and 4 Serial ports. The PFM-540i supports CRT and 18/24-bit TTL LCD panels and PC/104 expansion, and can utilize up to 1 GB of DDR SDRAM.

The PFM-540i supports Linux, Real-Time Linux, Windows XP/XPE, WinCE, and DOS 6.22 running from either a CompactFlash disk or a conventional Hard Drive. It gives developers a low-power, high-performance platform that can fit into the tightest places. PC/104 expansion allows features to be quickly added using any of EMAC's many PC/104 expansion modules. Price is $255 Quantity 1.
